

Psoriasis and Eczema lotion

The Ardoz Psoriasis and Eczema lotion is intended to treat itchy, red and scaly skin or scalp that is caused by psoriasis or dermatitis (eczema). Ardoz Psoriasis and Eczema lotion reduces itching and soothes irritated skin. Depending on the condition of the skin, it may be necessary to use the product for several weeks before any improvement can be observed. The skin-friendly composition does not contain corticosteroids, antibiotics and perfumes. Skin disorders such as psoriasis, eczema and atopic eczema should be diagnosed beforehand by a physician. If you are unsure about the cause of your disorder, contact your doctor.

Action

The action of Ardoz Psoriasis and Eczema lotion is based on gradual oxygen release. This continuous oxygen release creates an optimal environment for healing of the skin. The effectivity of the Psoriasis and Eczema lotion has been proven in clinical research.

Frequency of use

Psoriasis and dermatitis are often chronic skin diseases. Because the action of the Ardoz Psoriasis and Eczema lotion is based on gradual oxygen release and does not contain corticosteroids, antibiotics or perfumes, the product can be used for a prolonged period of time.

Directions for use

Apply a thin layer of lotion to the affected area of the head or body three times a day. Prolonged use is allowed.

Side effect(s)

No adverse effects have been reported when used in accordance with the instructions of use. In rare cases, the skin complaints may worsen slightly at the beginning of treatment. This effect will diminish quickly and the use of Ardoz Psoriasis and Eczema lotion does not necessarily need to be discontinued. Contact your doctor if the symptoms worsen for more than 21 days.

Pregnancy/breastfeeding

No investigation was performed regarding the use of the Ardoz Psoriasis and Eczema lotion during pregnancy and/or breast-feeding.

Shelf life

Do not use after expiration date: See on the bottom of the box and on the bottle.
Do not use after 3 months from the opening date.
